

## **Gassó SA**

Founded in 1862 in Barcelona-Spain has over the centuries developed its expertise as a leading manufacturing and distribution company specialized in industrial supply of hoses and components as well as loading/metering systems and solutions for the Petro-Chemical Industry.

Still today the Gassó family is actively leading the different operations.

Main products are Gassoflex composite hoses, rubber hoses and stainless steel hoses, tank truck equipment's, Loading arms and accessories, metering skids and automations system up to EPC contractor for loading terminal constructions.

Gassó's main production plant is in Barcelona but we have production plants and or sales offices in Spain, Portugal, Polen, Romania, Senegal, Jordan and Holland.

Gasso just opened a new 6000 square meter production area for the manufacturing of the Gassoflex composite hoses and loading arms and accessories.

### Gassoflex composite hoses

The line of Gassoflex hoses runs from ¾" up to 10" for a wide range of petro-chemical products, as well as for LPG and LNG.

The unique feature of the Gassoflex hoses is that they are manufactured on 6 fully automated production lines completely computer controlled meaning no people who are walking up and down the production line to roll the films/fabrics and wires.

In this way Gasso is able to offer a consistently high quality at a competitive price and is able to supply big volumes on a short notice. The range of Gassoflex hoses is covered by the major international approvals. The Gassoflex hoses are worldwide distributed by distributors and or agents in most countries around the globe.

## Gassó loading arms and accessories

Gasso is producing a line of loading arms and unloading arms for Petro-Chemical products from 1" up to 6" for Tank trucks and Rail cars.

The loading arms with a wide range of accessories can be supplied in Aluminium, Carbon steel, Stainless steel and with PTFE lining. Loading arms for special applications are also available like :

- Loading arms with heating systems for products as bitumen.
- Loading arms for LPG applications
- PTFE Lined Loading arms for Chlorine applications.
- Loading and un-loading arms for Ammonia applications.
- Loading arms fully pneumatically and or hydraulically operated.
- Folding Stairs and complete loading platforms.

**Gasso also manufactures and offers:**

- Floating suctions and rain drains up to 24"
- Breakaway couplings up to 8"
- Metering skids
- Automation systems also as system integrator
- EPC contractor for loading terminal constructions
